Objective:

Computer Science graduate with eagerness and passion to apply knowledge from coursework and self-study to a junior developer role.

Skills:

- Proficient in Microsoft Excel and Word.
 - Experienced with programming languages: Java, C++, JavaScript, C#, C, and HTML.
 - Familiar with Unix and Windows environments.
 - Effective communication skills, both verbal and written.
 - Knowledgeable in data structures and algorithm analysis.
 - Excellent problem-solving abilities.
-

Projects:

Hair Loss Prediction Project

- Conducted data mining to predict hair loss patterns based on demographic and lifestyle data.
- Utilized machine learning techniques to analyze and predict potential outcomes.

E-commerce Platform Capstone Project

- Collaborated with fellow students using Scrum meetings and sprints throughout the development cycle to complete an e-commerce platform.
- Developed using PHP, MySQL, HTML, JavaScript, and AJAX to create a sleek, responsive shopping experience.
- Designed an admin portal for catalog updates and management.

Frontend-Backend Applications

- Developed several frontend-backend applications using SQL for database management and retrieval of information.

Flutter and React Applications

- Created applications using Flutter and React frameworks for cross-platform development.

Game Development with Unity

- Designed and developed multiple games using Unity game engine and C#

Graphics Programming with OpenGL and C++

- Explored graphics programming using OpenGL and C++, focusing on rendering techniques and optimization.
-

Education:

- Bachelor of Science in Computer Science
Florida International University, Miami, Florida
- Made Dean's List multiple times for academic excellence
- Relevant Courses:
 - Software Engineering
 - Human-Computer Interaction
 - Introduction to Databases
 - Introduction to Artificial Intelligence
 - Introduction to Data Mining
 - Data Structures
 - Graph Theory
 - Theory of Algorithms
 - Numerical Analysis
